## **Waste Management Acquires Medical Waste Processing Facility and Business in Phoenix**

**PHOENIX** – June 4, 2010 – WM Healthcare Solutions, Inc., a subsidiary of Waste Management, Inc. (NYSE: WM), today announced that it has acquired a medical waste processing facility and certain other medical waste business assets located in Phoenix, Arizona, from Milum Textile Services Co., a provider of linen services and medical waste collection and treatment services. Terms of the deal were not disclosed.

The purchase of the medical waste autoclave facility fits into Waste Management's strategy to manage solid waste, medical, recycling and pharmaceutical waste for the healthcare industry. The 35,000 square-foot facility today serves approximately 250 licensed healthcare facility customers, employs six people and has the capacity to process 30 tons of medical waste per day.

"Our acquisition of Milum's medical waste autoclave facility is another step forward in growing our medical waste business," said Mike Archer, general manager of WMHS. "This investment represents an important strategic opportunity to offer disposal options, consulting and cost savings for hospitals, clinics, laboratories, doctors' offices and a variety of other healthcare businesses in Arizona. Our integrated solutions approach allows us to not only provide safe medical waste treatment and disposal services, but also solid waste, recycling, and construction and demolition materials collection, processing and disposal services to the healthcare industry. The acquisition also adds to our capacity and geographic presence to treat and manage waste from healthcare customers," Archer said.

### **About Waste Management and WM Healthcare Solutions**

Waste Management, Inc., based in Houston, Texas, is the leading provider of comprehensive waste management services in North America. Through its subsidiaries, the company provides collection, transfer, recycling and resource recovery, and disposal services. It is also a leading developer, operator and owner of waste-to-energy and landfill gas-to-energy facilities in the United States. The company's customers include residential, commercial, industrial, and municipal customers throughout North America.
