

## **Saves you time and hassles, too.**

### **Cost savings, compliance and convenience. One call does it all.**

Why go to the trouble and expense of using a specialty medical waste service when you don't need one? The MedWaste Tracker<sup>SM</sup> two-part delivery system is the simple, safe way to dispose of sharps and other contaminated materials.

Use the rigid, red container to collect and contain the waste. When the container is full, put it into the postage-prepaid, mailable box and give it to the U.S. Postal Service. We'll take it from there.

With the MedWaste Tracker, there's no needless expense. No needless pick-ups – so no needless fuel consumption and emissions. The system complies fully with EPA, OSHA and other government regulations. And with one call to us, you can have it right at your fingertips.

Keep the MedWaste Tracker in your nursing office at school. And be sure to let your students, their families, and other school employees know how easily they can manage their sharps from home. Have them visit *ThinkGreenfromHome.com* to find out more.

**To learn more about the Medwaste Tracker, contact a Waste Management healthcare specialist at 1-877-271-4830 or visit [healthcare.wm.com](http://healthcare.wm.com) and click on "MedWaste Tracker?"**
