# Healthcare Integrated Waste Solutions

## Transforming healthcare waste from a costly burden into a resource.

Your healthcare facility probably generates at least seven categories of waste. When waste is incorrectly segregated, it can be costly.

At Waste Management, our integrated services can help contain costs for your facility while protecting the environment, your patients and staff, and your reputation. As North America's largest environmental services company, we've already saved other highly regulated businesses more than \$60 million by recovering value from what they normally throw away or otherwise dispose of inefficiently.

Healthcare customers across the country are achieving sizable cost savings and improving their environmental performance by letting us handle not just some of their waste, but all of it. Call us, and let's discuss how we can do the same for you.

## Integrated solutions for all your waste.

### Solid Waste

We can help you reduce volume and dispose of solid and non-hazardous waste. Plus, our waste-to-energy and landfill-gas-to-energy programs are turning waste into clean, renewable energy, creating wildlife habitats, and producing many other eco-friendly benefits.

### Recyclable Waste

We are the largest recycler of municipal solid waste in North America. From plastics and glass to metal, cardboard and paper, we can help you recover value from what you're used to throwing away.

### Universal Waste

Our recycling programs reclaim valuable resources from electronics, fluorescent bulbs and batteries for manufacturing reuse. We help keep universal waste out of landfills, thus protecting human health and the environment.

### Medical Waste

We can work with you through every step of your supply and activity chain. Our far-reaching programs help make sustainability affordable and include on-site implementation as well as employee training. From proper segregation to appropriate transport and treatment, we can handle every step in the process of managing medical waste.

### Pharmaceutical Waste

Rely on Waste Management's PharmEcology® Services as your partner in creating and implementing a pharmaceutical waste management system that helps ensure proper categorization and appropriate treatment.

### Hazardous Waste

Our healthcare solutions experts are well-versed in regulations pertaining to waste that is potentially harmful to human health and the environment. We can work closely with you to develop processes that safely and efficiently direct your institution's waste to the appropriate transportation and treatment resources.

### Confidential Document Destruction

Look to Waste Management for safely disposing of your institution's confidential documents. Our process assures you of 100 percent destruction and complete confidentiality.
